

AXIS T250

Almost five tons of weight, eighteen people on board. It is clear why AXIS will for the first time install the most powerful engine from Malibu Boats, the 607 horse power Moonson LT4, on its 2022 flagship model. The boat received an updated sound system from WetSouds, a new control console. The wave behind the tow will appeal to both amateurs and professionals, because the T250 is equipped with advanced surf options from Malibu Boats: the Wakebox 3 Tank Ballast System, the third generation Power Wedge III plow with the functions of quickly getting the boat on planing and creating the necessary wave shape, as well as the Surf Gate stern blade system, which changes the side of the wave in 2 seconds. The ideal wave can be achieved without overflowing the ballast tanks! Additional changes in the boats touched on ergonomics and design. Pilots, in addition to the new control panel, also received a new seat, a more comfortable steering wheel, an extended armrest with a throttle / reverse handle, an enlarged glove compartment, elegantly finished with SoftGrip coating in the color of the cabin. For 2022 models, the bow and cockpit features redesigned handles and stainless steel instead of plastic cupholders. There are new colors of gelcoat, vinyl and non-slip SoftGrip coating.
